

## Save Energy at Home with Electric Efficiency

Save money, improve comfort and ensure a cleaner environment with energy saving offers for residential electric customers from National Grid.

- ENERGY STAR® Thermostats
- Central Air Conditioning
- Central Air Source Heat Pump
- ECM Furnace Fan
- Electric Heat Pump Water Heater
- Duct and Air Sealing

**nationalgrid**

The power of action.™

Wouldn't it be great if you could save money, improve the efficiency of your home, and help ensure a cleaner environment?  
You can with efficiency from National Grid.

**Follow these steps to participate:**

- 1) **Consult your qualified contractor.**
- 2) **Complete this application and determine anticipated rebate.**
- 3) **Return application with a copy of your dated invoice/receipt and a copy of Manual J sizing. Include pre/post blower door and duct blaster readings if needed.**  
(Remember, your invoice or receipt must include the complete model number of each unit installed.)

**Mail to: National Grid Electric Efficiency**  
40 Washington Street, Suite 2000  
Westborough, MA 01581

For questions please call **1-866-543-9303**,  
email [ngridinfo@efi.org](mailto:ngridinfo@efi.org) or visit  
[www.thinksmarthinkgreen.com](http://www.thinksmarthinkgreen.com).

**2009 Residential Energy Efficiency Rebates**

PRODUCT	REBATE	BPI Contractor Incentive**
<b>REPLACEMENT THERMOSTATS</b>		
ENERGY STAR® rated programmable thermostats - maximum 2 per household	\$25/ea.	
<b>CENTRAL AIR CONDITIONING</b>		
SEER ≥ 15, EER ≥ 12.5	\$400	\$200*
SEER ≥ 16, EER ≥ 13.0	\$600	\$200*
<b>CENTRAL AIR SOURCE HEAT PUMPS</b>		
SEER ≥ 15, EER ≥ 12, HSPF ≥ 8.5	\$400	\$200*
SEER ≥ 16, EER ≥ 13.0, HSPF ≥ 9.0	\$600	\$200*
<b>OTHER MEASURES</b>		
Electronically Commutated Motor (ECM) furnace fan	\$200	
Electric heat pump water heater, Energy Factor > 2.0	\$400	
Duct and air sealing by BPI certified contractor†	up to \$600	

SEER = Seasonal Energy Efficiency Ratio. EER = Energy Efficiency Ratio. HSPF = Heating Seasonal Performance Factor.

\* To qualify for these rebates, a copy of Manual J must be attached to indicate that an Air Conditioning Contractors of America (ACCA) Manual J calculation has been completed to determine proper sizing.

† Duct and air sealing must be assisted by blower door and duct blaster testing, and be completed by a BPI certified/ accredited contractor. The receipt must include pre and post blower door and duct blaster readings and materials installed.

\*\* Contractors who are certified/accredited by the Building Performance Institute may receive incentives directly from National Grid for installations in qualified customers' homes if customer correctly completes the contractor information in the attached rebate application. BPI is a national resource for building science technology that sets standards for assessing and improving energy performance, health and safety of homes. For more information, visit [www.bpi.org](http://www.bpi.org).

### Work Completion and Rebate Validation.

I hereby affirm the following Prescriptive Energy Efficiency Equipment has been installed. I acknowledge that all work is subject to on-site work verification and inspection as may be required by state and local law and by National Grid. I am aware of and agree to the Terms & Conditions stated on the reverse side of this application and am attaching copies of itemized proofs of purchase and invoices for the installation performed.

Customer Signature: \_\_\_\_\_ Date: \_\_\_\_\_

Upstate New York

**nationalgrid**

The power of action.™

Equipment installed from 3/17/09 to 12/31/09 is eligible. Rebate form and required documentation must be postmarked by 1/31/10. One account number per form. Some restrictions may apply. Rebate offers are subject to change without notice.

REUNY 9-09

# Home Performance with ENERGY STAR®

Take advantage of the incentives\* available through Home Performance with ENERGY STAR offered by the New York State Energy Research and Development Authority (NYSERDA).

- Get an expert assessment of your home by a participating Home Performance Contractor
- Find exactly where you're losing energy and how to fix it
- Low-interest financing
- Income-eligible households qualify for a grant of up to \$6,000

\*Customers cannot receive National Grid rebates and incentives from NYSERDA for the same equipment.

Through a Comprehensive Home Assessment, a participating Home Performance Contractor can determine areas of your home where energy efficiency, comfort, and health and safety improvements should be made. Using special diagnostic equipment, a series of tests and visual inspections check the efficiency of appliances and heating and cooling equipment. In addition, your contractor can find where air is leaking out of your home. When the assessment is complete, you'll receive a report of recommended improvements, the cost of each improvement, and estimated payback.

NYSERDA's Home Performance with ENERGY STAR Program uses a network of independent home improvement contractors who are accredited by the Building Performance Institute (BPI). BPI is a national resource for building science technology that sets standards for assessing and improving energy performance, health and safety of homes. BPI-accredited contractors are trained to take a "whole-house" approach — one that considers how the house works as a system.

**To find a Home Performance Contractor near you, call 1-877-NY-SMART or visit [www.getenergysmart.org](http://www.getenergysmart.org) for information.**

# National Grid Residential Energy Efficiency Programs

## Terms & Conditions

- 1. Incentives** - Subject to these Terms and Conditions, this program is offered by Niagara Mohawk Power Corporation (the "Company"). The Company, through its contractual vendor, Energy Federation Incorporated (the "Vendor"), will pay incentives to eligible customers and BPI contractors in the Company's Service Territory, for the purchase and installation of the equipment/products described in this literature and within this application.
- 2. Customer Eligibility** - New equipment installed from 3/17/09 to 12/31/09 is eligible. It must have been new equipment installed at the installation address listed on this application and the required documentation listed must be postmarked no later than 1/31/10. Customer must be a residential electric customer of the Company in Upstate New York. Check [www.thinksmarthinkgreen.com](http://www.thinksmarthinkgreen.com) frequently for program updates or installation extensions.
- 3. Post-Installation Work Verification** - The Company reserves the right to perform a verification of the specified installation. If the Company and/or Vendor determines that the equipment was not installed in a manner that is consistent with program guidelines, the Company and/or Vendor may require that the installation be modified before making any incentive payments. The cost of such modifications is the responsibility of the customer. I hereby authorize the Company to release my energy use information to Energy Efficiency Program Sponsors (EEPS) and System Benefit Charge (SBC) program administrators and/or its designee. I understand that such information will be kept confidential and used only for the purpose of determining program eligibility and energy savings.
- 4. Installation Requirements** - Installations must be completed in conformance with state and local code requirements and by a qualified contractor to qualify. Customer self installs do not qualify for rebates. Central air conditioning systems and electric air source heat pumps must be listed and certified by the Air Conditioning, Heating and Refrigeration Institute (AHRI) and meet the program SEER, EER and HSPF (for electric air source heat pumps) to qualify. The air conditioning condenser and evaporator coil must be new and replaced together. The condenser and coil are separate components in a split air conditioning or heat pump system; but for rebate purposes, these are considered one unit. To verify central air conditioning and heat pump system eligibility, please refer to the AHRI directory ([ahridirectory.org](http://ahridirectory.org)) or the Consortium for Energy Efficiency ([ceehvaccdirectory.org](http://ceehvaccdirectory.org)). Manufacturer's spec sheets may be accepted ONLY if equipment is not yet AHRI rated and only if AHRI rating is pending.
- 5. Proof of Proper Installation** - As part of its incentive application, the Customer is required to submit dated copies of all paid invoices documenting the installation (including all materials, labor and equipment invoices) which reflect the actual cost of purchasing and installing the equipment. Installing contractor must complete and attach the ACCA Manual J Calculation for proof of proper sizing of air conditioning equipment and heat pumps.
- 6. Indemnification** - Customer shall defend, indemnify and hold harmless the Company and its officers, directors, employees, agents, servants and assigns from and against any and all losses, claims, demands and/or liability for damage to property, injury or death of any person, or any other liability incurred by the Company, including all expenses, legal or otherwise, arising out of or related to the equipment or installation, except to the extent attributable to the negligence of Company. In no event shall Company's liability to Customer exceed the incentive amounts.
- 7. Limited Scope Review** - The scope of review by the Company and the Vendor and their inspector of the installation of the equipment is limited solely to determine whether incentives are payable. It does not include any kind of safety or code review and should not be relied upon as one.
- 8. Incentive Amounts** - The Company will provide incentives for approved high-efficiency measures, up to incentive amount indicated in the program literature and within this application. If more than ten (10) units of equipment are installed in a single dwelling, the Customer must obtain pre-approval from National Grid for incentive funds to be reserved. Customers cannot receive a rebate from National Grid and incentive from NYSERDA for the same equipment.
- 9. Payment** - The Company, through the Vendor, expect to make incentive payments to eligible customers within 45 days of a satisfactory work verification. The customers must refund any incentive made to the extent the contractor or equipment does not satisfy program requirements.
- 10. No Warranties** - The Company and the Vendor do not endorse, guarantee or warrant any particular contractor, manufacturer or product installation. The Company and the Vendor do not make any representation of any kind regarding the results to be achieved by the equipment or the adequacy or safety of such equipment.
- 11. Changes in the Program** - Equipment Incentive Program/Tax Liability Conditions and details of the Program are subject to change without prior notice and incentive offers may increase or decrease over time. The Company reserves the right to modify or terminate the Incentive Program without notice. Participants of the program may be subject to tax liability for the value of goods and services received through the program pursuant to state or Federal income tax codes. The Company is not responsible for any tax liability which may be imposed as a result of receipt of the rebate by the Customer.
- 12. Contractor Insurance** - The Company is not responsible for any damage that may be caused by or arise out of an installation of any equipment. The customer is responsible for selecting Contractors who are qualified and carry adequate insurance coverage.

National Grid is one of the largest investor-owned energy companies in the world. In the US, we serve nearly 5 million electric and 3.4 million gas customers in Massachusetts, New Hampshire, New York and Rhode Island. Save energy and money with our award-winning efficiency programs. Visit [www.thinksmarthinkgreen.com](http://www.thinksmarthinkgreen.com).

Additional energy efficiency services may be available from the New York State Energy Research and Development Authority (NYSERDA). For more information, visit [www.getenergysmart.org](http://www.getenergysmart.org).
